5 Courses

- Introduction to Deep Learning & Neural Networks with Keras
- Deep Learning with Keras and Tensorflow
- Introduction to Neural Networks and PyTorch
- Deep Learning with PyTorch
- AI Capstone Project with Deep Learning

May 5, 2026

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Professional Certificate

IBM Deep Learning with PyTorch, Keras and Tensorflow

Alex Aklson, Jeremy Nilmeier, Joseph Santarcangelo Ricky Shi, Romeo Kienzler, Samaya Madhavan Wojciech 'Victor' Fulmyk

This certificate holder can build, train, and deploy deep learning models, including neural networks. They can create models for image recognition, natural language processing (NLP), and recommendation systems. Plus, they can use PyTorch and SoftMax regression and use activation functions. They can also create custom layers and models using Keras, integrate Keras with TensorFlow 2, and develop advanced convolutional neural networks (CNNs). They can develop transformer models for sequential data and time series predictions and apply unsupervised learning concepts and reinforcement learning. Plus, they have demonstrated their ability to create deep learning pipelines, improve models, and apply deep learning to real world challenges.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
