11 Courses

- Introduction to Data Engineering
- Introduction to Relational Databases (RDBMS)
- Python for Data Science, AI & Development
- Python Project for Data Engineering
- Databases and SQL for Data Science with Python
- Hands-on Introduction to Linux Commands and Shell Scripting
- ETL and Data Pipelines with Shell, Airflow and Kafka
- Data Warehouse Fundamentals
- Relational Database Administration (DBA)
- Relational Database Administration Capstone Project
- Generative AI: Elevate your Data Engineering Career

Jun 1, 2026

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Professional Certificate

IBM Relational Database Administrator with GenAI

Holders of this Professional Certificate have demonstrated their proficiency in aspects of database administration, including database design, security, SQL querying, managing backups, process automation, and performance tuning. They also showcased their Python skills in a real-world data engineering project. Throughout the program, badge earners gained hands-on experience using essential tools and techniques for database management platforms like MySQL and PostgreSQL, data processing using Python, shell scripting using Linux, and pipeline design using Apache Airflow. They can apply these skills to manage, secure, and optimize relational databases. This certification highlights their readiness for roles in database administration, data engineering, and related fields.

Rav Ahuja,Global Program Director, Skills Network,
Joseph Santarcangelo, Senior Data Scientist, IBM,
Abhishek Gagneja, Python and AI Subject Matter Expert

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
