

13 Courses

- Getting Started with Google Kubernetes Engine
- Kubernetes Engine: Qwik Start
- GKE Autopilot: Qwik Start
- Managing Deployments Using Kubernetes Engine
- GKE Workload Optimization
- Understanding and Combining GKE Autoscaling Strategies
- Manage Scalable Workloads in GKE
- Hardening Default GKE Cluster Configurations
- Cloud Operations for GKE
- Managing a GKE Multi-tenant Cluster with Namespaces
- GKE Backup and Restore
- Manage Multi-cluster Workloads at Scale with GKE Fleets and Teams
- Manage and Secure Distributed Services with GKE Managed Service Mesh

ERIC DAVID RODRIGUEZ FLORES

has successfully completed the online Specialization

Container Workload Management and Production Operations

Now that you have completed Container Workload Management and Production Operations, you stand out with practical skills in Kubernetes and Google Kubernetes Engine production operations. This certificate demonstrates your ability to deploy and scale containerized applications, optimize and monitor GKE workloads, strengthen cluster security, manage backup and recovery, and operate multi-tenant and multi-cluster environments. Throughout this Specialization, you've gained hands-on experience applying GKE capabilities to workload deployment, scalability, security, observability, resilience, and distributed application management.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
